

# KAJETAN DUDEK

## SENIOR SOLIDITY DEVELOPER

[kajetan@ebjan.xyz](mailto:kajetan@ebjan.xyz)

Telegram: @kikijk

Github: <https://github.com/thedarkjester>

Location: Abu Dhabi, UAE

Senior Solidity Developer with extensive experience in blockchain development and smart contract architecture. Demonstrated proficiency in JavaScript/TypeScript. An important note: I am **Deaf-Mute**, so I prefer communication through text-only channels.

## EXPERIENCES

### Senior Solidity/JavaScript Developer - DMail

2022-2024

Collaborated in a team developing a messaging exchange system. Contributed to the development of infrastructure contracts and worked closely with the frontend team on web3 integration.

### Solidity Developer - Consensys

2019-2022

Participated in the team effort to develop a swap aggregator contract for Metamask's internal exchange. Played a key role in writing the contract and contributing to the application's architectural design. Gained initial experience in leading a team of developers, overseeing project execution and guiding technical decisions.

### Web2.0 Developer - Phenomenon Studio

2015-2019

Extensive experience in developing traditional Web 2.0 applications, primarily focused on backend development. Proficient in JavaScript with some experience in PHP. Developed custom CRMs, accounting systems, and software solutions for the banking sector. Gained initial experience in leading a team of developers, overseeing project execution and guiding technical decisions.

## EDUCATION

### University of Wroclaw, Poland

2015

Bachelor in Computer science

## EXPECTED SALARY

\$15,000 per month

+ signing bonus equivalent to one month's salary

## SKILLS

Solidity +++++

JS/TS +++++

Contract Audit +++++

Ethereum / EVM +++++

App architecture +++
